

Technical Information Sheet Article No. 0673

BFA

Highly effective, liquid restoration solution with a bactericide, fungicide and algicide effect

Baua: Registration number N-34839

Range of use

Remmers BFA is a restoration solution for removing alga, fungi, lichen and moss from mineral building material. It is also used as a preventive treatment for building up an "active ingredient depot".

Directions

Remove heavier superficial infestation mechanically or with a high pressure cleaner. Brush on or flow coat Remmers BFA several times to kill the mycelia (roots). After an action time of approx. 6 hours, surfaces treated with Remmers BFA can be further worked. Do not wash off – leave Remmers BFA as a biocide depot on the substrate.

Active ingredients:

0.045% isothiazoline
1.00% benzalkonium chloride
100 g of Remmers BFA contains
0.045 g isothiazoline
1.00 g benzalkonium chloride

Working temperature

Do not use at object temperatures < 5 °C or > +30 °C.

Notes

Subsequent hydrophobic impregnation of mineral substrates with Fungosil Impregnation Agents

Characteristic data of the product

Density	1.0 kg/l
pH value:	neutral
Appearance:	clear to slightly yellow watery liquid

protects the surfaces from further soiling.

These types of impregnation agents reduce the absorption of water in treated substrates and therefore also reduce the tendency to become infested with alga, lichen and moss.

Use biocidal products safely and responsibly. Always read the label and product information before using!

Tools, cleaning

Scrubber, brush, paint roller and low pressure spraying equipment. Clean tools after use with water.

Packaging, application rate, shelf-life

Packaging:

1 l, 5 l and 30 l plastic canisters

Application rate:

At least 0.2 l/m², depending on degree of soiling.

Shelf-life:

At least 3 years in closed containers stored cool but frost-free. Store out of reach for children.

First aid measures

- **General notes:**
Take off clothing soiled with the product immediately.
- **After inhalation:**
Ensure fresh air.
See a doctor if you have symptoms of discomfort.
- **After skin contact:**
Wash immediately with soap and water and rinse thoroughly. If skin irritation persists, seek medical advice.
- **After eye contact:**
Rinse open eye for several minutes under running water and seek medical attention.
- **If swallowed:**
Rinse out mouth and drink copious amounts of water. Do not induce vomiting, seek medical attention immediately.

Danger notes

Irritates skin and eyes.
Sensitisation is possible through skin contact.

Safety advice

Keep locked up and out of reach of children.
Avoid contact with skin.
Do not lead into the sewer system.
Wear suitable protective gloves and face/eye protection when working.

Personal protective equipment is required for spraying procedures and when cleaning dry. Use respiratory protection with a particle filter P2 (made by e.g. Dräger). For suitable protective gloves, see Safety Data Sheet. Wear closed work clothes.

Disposal

Dispose of product remains in compliance with valid regulations. Completely empty containers should be recycled.

Refuse Code No.: 200129

Safety, ecology, disposal

Further information on safety when transporting, storing and handling as well as on disposal and ecology is found in the latest Safety Data Sheet.

The statements above are compiled from our field of production and according to the latest technological developments and application techniques.

Since application and working are beyond our control, no liability of the producer can be derived from the contents of this information sheet. Any statements made beyond the contents of this information must be confirmed in writing by the producer.

In all cases, our general conditions of sale are valid. With the publication of this Technical Information Sheet all previous editions are no longer valid.
