

proAqua wood finishes

ZERO
VOC content

To protect and enhance the beauty of wood, look no further than earthBorn's proAqua range. These new generation water-borne coatings are unlike any other water based products and are suitable for interior or exterior use.

proAqua Satin Varnish and Eggshell offer high performance, quick drying finishes that are in tune with nature.

Uniquely, proAqua products are totally oil and acrylic free and have virtually no odour. They are VOC free and certified¹ not to emit any harmful emissions during or after use, which makes them safer, healthier and more pleasant to use.

proAqua Satin V arnish is the ultimate, modern varnish for woodwork, while proAqua Eggshell is the healthy , high performance alternative to traditional oil based eggshells.

proAqua EGGSHELL

As an alternative to traditional oil based eggshell paints, proAqua Eggshell is a real eye-opener.

Behind its soft satin sheen and contemporary colour range lies a highly advanced formulation that helps care for wood for longer.

proAqua Eggshell provides a flexible, microporous finish that is breathable, durable, washable and will not fade with time.

Suitable for interior and exterior use, proAqua Eggshell is ideal for doors, window frames, fascias, cladding and brightening up and protecting garden furniture.

ProAqua Eggshell is easy to apply, quick drying and covers well. No separate primer or undercoat is required (for new wood just dilute the first coat with 10% water)².

Allow 11 – 14sq m/litre and two hours before applying a second coat (touch dry after 15 minutes).

Sizes and Product Codes

Available in 100ml tester pots and volumes of 2.5L pots

Due to seasonal changes in the colour range, please refer to our website for current colours and product codes.

Ingredients

Water, pigments, mineral filling material, vinegar ester, titanium dioxide, preservatives.

¹ Certified by German TÜV testing authority .

² Surfaces previously painted with oil based finishes may require additional preparation. Please refer to the earthBorn website or product data sheet.

proAqua SATIN VARNISH

Water-borne and breathable, yet water repellent, proAqua Satin Varnish is a remarkable new treatment for interior and exterior woodwork.

It offers a high performance, breathable finish that remains flexible and resists flaking and blistering. Importantly, it is long lasting and will not yellow with time.

Available in clear, classic wood and contemporary shades, there's a choice of proAqua Satin Varnish to suit all interior or exterior applications.

Interiors

All shades are suitable for interior use. Crystal Clear offers unparalleled clarity whilst all the shades offer a superb, satin finish. It is ideal for woodwork such as internal doors and window frames, skirting boards, dado and picture rails, furniture and shelving.

Exteriors

All shades except Crystal Clear are suitable for external use (UV Clear is an alternative to Crystal Clear for external use and is specially formulated with UV stabilisers to minimise fading and discolouration of the wood). Designed to enhance and protect exterior woodwork, it is ideal for doors, window frames, fascias, cladding and garden furniture.

Why use earthBorn proAqua products?

Property	Conventional solvent based eggshell or varnish*	Other water-borne eggshell or varnish*	proAqua Eggshell or Satin Varnish
Water soluble	no	yes	yes
Odour	high	low	very low

Totally clear	no	no	yes**
Quick drying	no	yes	yes
Acrylic free***	no	no	yes
Oil free	no	no	yes
VOC free***	no	low	yes
Breathability	very poor	average	very high

* Information for 'conventional solvent based' and 'other water-borne' products is indicative of typical products and is not specific to any brand. Performance and characteristics may vary from brand to brand.
** Refers to proAqua Crystal Clear varnish for interior use.
*** Acrylic softeners and VOCs are widely accepted as being damaging to the environment and contributing to global warming. They are also hazardous to health. Acrylics reduce the breathability of the coating.

proAqua Satin Varnish is easy to apply, quick drying and offers excellent covering properties.

Allow 11 – 14sq m/litre and 60 minutes before applying a second coat (touch dry after 15 minutes).

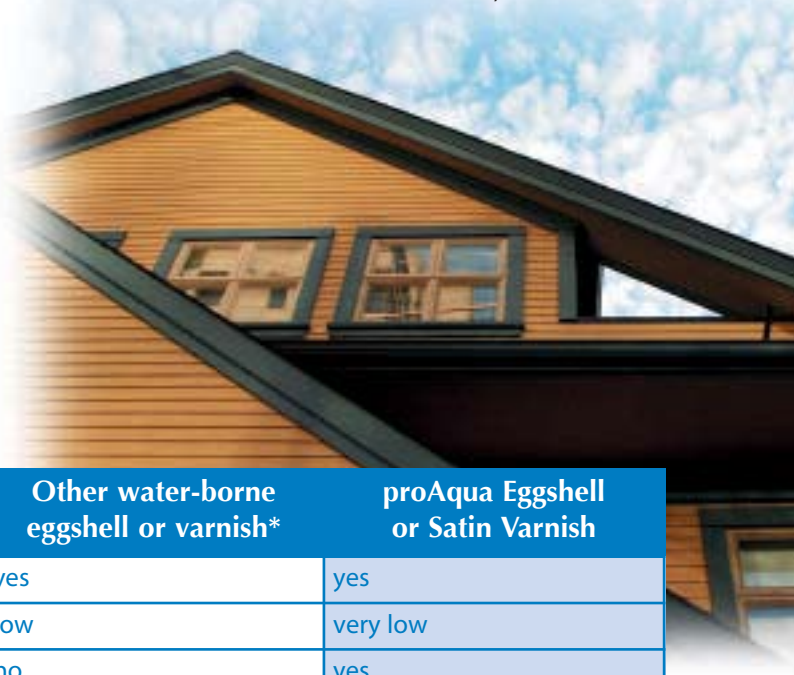

Sizes and Product Codes

Available in 100ml tester pots and 2.5 litre pots.

Due to seasonal changes in the colour range, please refer to our website for current colours and product codes.

Ingredients
